UNIVERSITY OF ALBERTA

PREFACE.

It is a singular fact that but very few persons acquire an efficiency in making an addition with rapidity and accuracy, and the consequence is that frequently mistakes occur, causing a great deal of labor and trouble in re-examining accounts, etc. There are but few who can add a column at a glance. The cause of this deficiency is, first: that the books generally used do not contain examples enough for practice; and secondly: even if they do contain sufficient examples, the teacher has no other mode to judge of the correctness of the pupil's performance, except either to repeat the work himself, or to take the trouble to compare

(3)

2562522

the result with the key, all of which consumes so much time, that little progress can be made by the pupil.

To aid the teacher, and to furnish practice to the pupil, we have prepared, in this little book, a sufficient number of examples in the fundamental rules, in which the teacher will be able to see at a glance, whether the answers are right or not, by means of a simple arrangement, which the teacher can obtain, by applying to the publishers, enclosing a postage stamp.

We are confident that this little book, new in its conception, will prove a valuable aid in all Primary Schools.

J. J. P.

Memphis, Tenn.
